## **ABSTRACT**

Digital currencies and blockchain innovation are innovative, but acceptance is early. After broad adoption, cryptocurrencies will generate the significant potential for new financial projects and development, making them inviting to start-ups and investors. The cryptocurrency industry continues to expand, and trading complexity, security concerns, and identity verification issues may deter potential consumers.

Cryptocurrencies' success depends on widespread adoption. Mainstream acceptance depends on a safe, integrated P2P market that lets beginners trade and exchange digital assets. The need for a well-structured, easy-to-use, safe cryptocurrency technology that provides non-technical people with the details, methods, and abilities needed to participate in the cryptocurrency domain is expanding.

---

## INTRODUCTION

Bitcoin's realization of Satoshi's original vision hinges on amassing a substantial user base. Despite its overall success, the inherent complexity of Bitcoin and other cryptocurrencies poses a challenge, impeding swift exploration and integration of crypto innovation for both individuals and companies. The perceived lack of security and high risk associated with cryptocurrencies renders them impractical for everyday transactions.

The emergence of numerous blockchain technologies and cryptocurrencies in recent years has not translated into mass adoption. This is primarily attributed to inadequate promotion, speculative bubbles, fraudulent activities, and user-unfriendly interfaces. Additionally, a surge in crypto exchange attacks and other violations has further eroded confidence in this nascent technology.

The hesitancy of merchants and service providers to accept Bitcoin payments is driven by concerns over exchange losses, price volatility, and regulatory uncertainties, compounded by challenges in financial, management, marketing, and other unpredictable realms. These hindrances limit the global outreach of valuable features and services within the crypto community. Although crypto holds the potential to become a global payment method, uncertainties persist. The volatile nature induced by speculators aiming for quick gains imposes significant costs on regular consumers seeking currency stability.

In the realm of practical transactions, BN COIN's market platform aims to facilitate real-life buying and selling activities. With a daily search feature, neighborhood members, businesses, and users can seamlessly connect on the platform. This enables providers and companies to effectively market and expand their product and service offerings, while users can effortlessly discover and purchase their daily necessities.

# PROBLEMS IN THE MARKET

Daily, more digital currencies are created. Choosing a currency to invest in is difficult for investors unfamiliar with various currencies. Few currencies will be chosen, including Bitcoin, Binance, Dash, and Litecoin. Hundreds of other currencies are also good investments with high returns and low risk of collapse. Without enough information, investors waste money on market assets and gain nothing. These famous currencies are priced high and rising regularly. Therefore, demand is great, Investors desire the best value, but valuation swings are uncontrollable. Thus, investing in more assets to increase returns is necessary. The cryptocurrency market index, which may be used to invest and track market fluctuations, is poorly disclosed.

---

## WHAT IS A CRYPTO CURRENCY?

Digital currencies like cryptocurrencies are independent of financial institutions, mints, federal governments, and associations. This has many benefits; it means the currency can't be controlled by people you don't trust; with fiat currencies like the Pound, Dollar, or Euro, an administration can change the currency's value, either directly or through quantitative aid, which reduces commitment for the nation but significantly affects average citizens.

Transactions don't need a "middleman" to authorize them; you have your own virtual wallet and treat them as your own 🏠 minimizing circumstances and fees and eliminating the risk of an organization withholding your funds. Perhaps the best view of cryptocurrencies is that they are not impacted by world limits. Every country has the same price, putting everyone on equal. Bitcoin is the first and most popular cryptocurrency.

---

# WHAT IS BLOCKCHAIN TECHNOLOGY?

## EXPLAIN BLOCKCHAIN TECHNOLOGY.

The technology behind Blockchain is similar to a database, but you interact with it individually. Blockchain represents a paradigm shift in how software engineers will design software applications in the future, thus developers must understand it. This new computer framework requires us to understand five fundamental ideas and how they relate: the blockchain, decentralized consensus, trusted computing, smart contracts, and proof of work or stake. This computer paradigm motivates the development of decentralized applications, a natural progression from distributed computing.

However, this is not limited to computing. Decentralized applications will enable societal, legal, governmental, and business decentralization since there is a race to decentralize everything and deliver power to the edge of networks. Let's prepare to grasp these concepts.

Blockchains store data semi-publicly in linear containers. Anyone may verify that you introduced that information because the container includes your signature, but only you (or the software) can unlock its contents because you securely possess the private keys.

Therefore, the blockchain works like a database, except its "header" is public. The data can be a valuable coin or crypto balance. Due to cryptography, the blockchain is an alternate value transfer method that no central authority or hostile third party may tamper with. Public/private hegemony—the blockchain's yin-yang—ensures public visibility but private inspection. It resembles your home address. Publicly publishing your home address doesn't reveal its inside. Your private key is needed to enter your place of residence, and no one else can claim that address.

The blockchain is also a software design technique that connects peer computers that use the same “consensus” procedure to release or record information and verify every transaction via encryption.

# A NEW WAVE OF CRYPTOCURRENCY TO KEEP AN EYE ON

1. Since the first cryptocurrency (Bitcoin) was introduced in 2009, the market has seen an explosion of similar digital currencies, each of which has seen a surge in popularity and value that is expected to continue. The value of cryptocurrency in general (not just Bitcoin) is expected to rise more this year, and this trend is expected to continue.

**2. Bitcoin (BTC):** Bitcoin continued to be the dominant cryptocurrency, with a market capitalization that often surpassed \$1 trillion. It experienced significant price fluctuations during the year. It reached new all-time highs, surpassing \$60,000 per BTC in 2021.

**3. Ethereum (ETH):** Ethereum, the second-largest cryptocurrency by market capitalization, was making progress toward Ethereum 2.0, a major upgrade intended to improve scalability and sustainability. The price of ETH also reached new all-time highs in 2021.

**4. Altcoins:** Various altcoins (cryptocurrencies other than Bitcoin) gained popularity and market capitalization. Examples include Binance Coin (BNB), Cardano (ADA), Solana (SOL), and Polkadot (DOT), among others. Many of these projects focused on improving scalability, security, and utility.

**5. DeFi and NFTs:** The Decentralized Finance (DeFi) sector continued to expand, with various protocols offering lending, borrowing, and yield farming services. Non-Fungible Tokens (NFTs) gained significant attention and were used in various industries, including art, music, and gaming.

**6. Regulation:** Regulatory developments were a significant concern in the cryptocurrency space. Many governments and regulatory bodies worldwide were exploring or implementing regulations to address issues such as investor protection, taxation, and money laundering.

**7. Institutional Adoption:** Institutional interest in cryptocurrencies continued to grow. Several well-known companies and institutional investors announced their investments in Bitcoin, contributing to the mainstream acceptance of cryptocurrencies as an asset class.

**8. Market Fluctuations:** The cryptocurrency market remained highly volatile, with rapid price fluctuations. Traders and investors needed to exercise caution due to the unpredictable nature of the market.

**9. Environmental Concerns:** There were ongoing discussions about the environmental impact of cryptocurrency mining, particularly regarding Bitcoin. Some projects were exploring more eco-friendly consensus mechanisms.

---

## WHAT IS BN COIN ?

The BN COIN is a token used in the Believe Network Space Ecosystem to prove ownership of market benchmark assets. The value of this coin is tied to the market price of fundamental cryptocurrency assets. Thus, this currency is going to change and perhaps be reissued more than once. The currency is exclusively sourced from trades and purchases on the decentralized marketplace, necessitating sustained public engagement. The influence of BN COIN on investor decisions, its potential to enhance the appeal of volatile currencies, and its role in fostering diversified markets highlight its significance.

The reliance of BN Coin on the global community is evident through activities such as holding, staking, buying, and selling, contributing to the Believe Network Space Project Eco-System, including ongoing initiatives like the Planet Upgrade System and upcoming projects such as Universe Project, NFT Royalty, Global Project, and Galaxy Project.

---

## PURPOSE OF BN COIN

BN COIN is created as a way for people to send money over the internet. It's a digital currency that's intended to provide an alternative payment system that would operate free of central control.

- **Payment System:** BNcoin allows for anonymous payments from one person to another in the Believe Network Space Eco-System for all programs, and everyone can buy, sell, and stake BN Coin globally without joining our eco-system. If he joins and works with the system, he will get lots of benefits like active income and passive income forever.
- **Alternative Money:** BNcoin was originally designed as an alternative to traditional money, so people could use it to purchase goods and services.

## Features

- BNcoin is a cryptocurrency, a virtual currency designed to act as money and a form of payment outside the control of any one person, group, or entity.
- There will only ever be 99,999 BN coins.

The primary goal of BN COIN  is to diversify the unpredictable cryptocurrency industry. This allows investors to invest in the whole cryptocurrency ecosystem without having coins in separate wallets or exchanges or betting on a specific coin. Due to the enormous amount of coins on the market, some are worth little. Top-performing coins may have subjective characteristics, but BN COIN aims to reduce investment risks and increase profits.

Some coins are highly unpredictable, highly correlated, and have a non-zero likelihood of unforced failure, thus investors must choose between maximizing expected profits and limiting unpredictability. BN COIN  aims to maximize the Sharpe ratio, which is the ratio of predicted portfolio returns to the portfolio standard deviation.

# WHY USE BN COIN ?

**AS A CRYPTOCURRENCY, BN COIN  FULLY EMBRACES ITS MERITS.**

**THIS INCLUDES:**

**Prevention of Identity Theft:** When you give a vendor your credit card, they have access to your whole credit limit, even if the deal is minimal. The store starts the payment and pulls the money from your credit card "force" facility. Cryptocurrency's "push" element lets holders transfer what they need to the vendor or beneficiary without additional information.

**Immediate Settlement:** Actual property usually requires attorneys, notaries, postponements, and fees. The bitcoin/cryptocurrency blockchain is a "considerable residential or commercial property rights database," Gallippi says. Bitcoin contracts can be written and promoted to eliminate or include outsider approvals, recommend external facts, or be completed at a later date or time at a fraction of the cost and effort of traditional asset transfers.

**Access to Everyone:** About 2.2 billion people with Internet or cell phones do not use conventional exchange systems. These are Bitcoin market preppers. Kenya's M-PESA system, a mobile phone-based money transfer and microfinance administration, currently includes a Bitcoin wallet for every three Kenyans.

**Lower Costs:** Nowadays, bitcoin exchanges don't charge transaction fees because the network pays miners. Even though there's no Bitcoin or cryptocurrency transaction cost, many expect customers to use Coinbase to create and maintain their own Bitcoin wallets. These firms, like PayPal, improve the situation for cash or charge card clients by offering an online Bitcoin exchange system, but they may impose fees. Note that PayPal doesn't accept or move bitcoins.

# BN COIN TECHONOMIC

COIN NAME	BELIEVE NETWORK SPACE
TOKEN SYMBOL	BN Coin
TOKEN PRECISION (DECIMALS)	18
BLOCKCHAIN	Smart Chain ( BN Scan- Soon )
TOTAL SUPPLY	99,999 BN Coin
CONTRACT ADDRESS	Soon
DEX (SWAP)	BN DEX SWAP (Soon)

## BELIEVE NETWORK SPACE COIN TOTAL SUPPLY- 99,999 BN COIN

BN Free Airdrop 1% - ( Registration & Refrel Team )

BN Reward- 5% ( On Planet Upgrade )

Exchange Listing / Creator / Top Promoter / Adviser & Development- 14%  
( It's Allocated For Top Promoters / Adviser And Upcoming Development )

BN CBN Coin Mining - 20%

Staking Income- 19.99%  
( It Is Initially Allocated For Staking Income Distribution.)

ICO PRE SALE- 40% ( BN COIN SALE FOR LIQUIDITY .)

## COIN DISTRIBUTION- ICO

A corporation can raise funds through an initial coin offering (ICO) by selling a new cryptocurrency. Investors receive cryptocurrencies in exchange for their financial contributions.

An ICO is akin to a stock market initial public offering (IPO).

An ICO, on the other hand, is an entry plan, whereas an IPO is an exit strategy.

An ICO is used by a startup to sell a project or product idea and enter the market.

An IPO allows a well-established private company to grow by selling a portion of its stock to the general public.

Although ICOs are frequently associated with crowdfunding, a private ICO that does not seek public investment is also viable. Startups employ initial coin offerings (ICOs) to avoid the regulated capital-raising process needed by venture capitalists or banks.

EOS is one of the largest ICOs on the market.

The largest and longest ICO, which raised over \$4 billion over the course of a year,

Ethereum (ETH) was one of the most successful initial coin offerings (ICOs) in history, raising over \$18 million in its 2014 ICO.

An initial coin offering (ICO) or initial currency offering is a sort of cryptocurrency investment. It is frequently a type of crowdsourcing, however, a private ICO that does not seek public investment is also feasible. During an ICO, a certain amount of cryptocurrency is offered to speculation or investors in the form of "tokens ("coins") in return for legal tender or other (usually existing and more stable) cryptocurrencies such as Bitcoin or Ether. If the ICO's financing target is fulfilled and the project is successfully launched, the tokens are marketed as future functional units of currency.

BN COIN aims to provide a platform that tracks the price changes of the top 30 most mined digital currencies. Furthermore, it aims to produce a highly valuable cryptocurrency that will provide investors with value for their investment while also giving information that will allow all investors, even those with an expert understanding of the cryptocurrency market, to make informed investment decisions. In this regard, BN COIN intends to generate funds that will be utilized to expand and market the platform to the cryptocurrency industry and interested investors, bringing more individuals on board to reap the benefits of this index cap information.

Users of BN Coin will be able to transact and exchange their coins promptly when the need arises, thanks to Binance technology. Furthermore, with the hope that the market will continue to expand, coin holders can be confident that their investment will have a chance to increase as well. Investors will be able to keep connected and informed of market developments and predicted changes, as well as make judgments on which currencies to invest in. This will provide a platform for new cryptocurrencies to attract investors and grow, generating higher returns like existing currencies have done in the years since their launch.

---

## ICO PARAMETERS

BN COIN  will be pegged on the DEX Pancake Swap first then will be on our own DEX Swap (Because of Prevention to High Volatility on Centralized exchanges )

**THE TOTAL BN COIN  DISTRIBUTED WILL BE: 99,999 BN COIN**

### **COIN DISTRIBUTION WILL BE AS FOLLOWS :**

**THE AIRDROP GOAL: 1,000 BN COINS**

**THE REWARD GOAL: 5,000 COINS**

**THE BN COIN MINING GOAL: 20,000 COINS**

**THE ICO GOAL: 40,000 COINS**

**THE STAKING GOAL: 19,999 COINS**

**PROMOTION, AWARD AND REWARD, TOURS, PROMOTER, SOFTWARE, AND FURTHER DEVELOPMENT: 14,000 BN COINS**

## BELIEVE NETWORK SPACE - BN COIN AIRDROP: 1% ( 1000 / 99,999 )

**JUST REGISTER WITH US AND GET "0.05 BN Coin"**

Also, Your Sponsor Will get a **"0.025 B-Network Invitation Bonus As BN Coin"**

Hurry Up Now This Value Is Limited To **1000 B-Network Coins\*\***

---

## B-NETWORK BN COIN REWARD: 5% ( 5,000 / 99,999 )

Out of 100%, **Supply - 5%** means Only 5,000 BN coins are available as rewards through the **Planet Upgrade Plan**. When the 5% coin-sharing part of the deal is done, rank upgrades will be given out. After that, only 5% of the total stock will be left.

SR.NO.	PLANET UPGRADE PACKAGES	REWARD BN COINS
1	EARTH- \$5	0.10 BN COIN
2	MOON- \$10	0.20 BN COIN
3	MARS- \$25	0.40 BN COIN
4	MERCURY- \$50	0.80 BN COIN
5	VENUS- \$100	1.60 BN COIN
6	JUPITER- \$250	3.20 BN COIN
7	SATURN- \$500	6.40 BN COIN
8	URANUS- \$1000	12.80 BN COIN

8	1,600	6,000	9,600,000
9	960	12,000	11,520,000
10	640	25,000	16,000,000
	40,000		60,328,000 USDT

---

## STAKING PROGRAM - 19.99% (19,999 / 99,999)

Staking is a process where BN Coin holders Hold BN Coin. The process involves holding a certain amount of cryptocurrency for a specified period of time. During this time, the cryptocurrency is locked up for Increased liquidity, and the rate of BN Coin  
**WE WILL SEPARATELY ANNOUNCE OUR STAKING PROGRAMMING HOW IT WILL WORK**

## BN COIN MINING PROGRAM - 20% (20,000 / 99,999)

Cryptocurrency mining is the process of validating transactions on a blockchain network, like Bitcoin, by solving complex mathematical puzzles. Miners use powerful computers to compete for the chance to add a new block of transactions to the blockchain and receive rewards in the form of newly created cryptocurrency coins.

**Believe Network Space - Eco-System**

---

## FUTURE USE OF BN COIN

Our primary ambition and goal is to create a cryptocurrency that is adopted globally by a mainstream audience. Our best chance of getting to that stage is to produce a platform that is focused on the needs of webmasters and accessible to everyone.

We intend to release merchant tools that will allow webmasters to use BN COIN  for taking digital payments via their websites.

**First of All, Our BN Coin will be Used in Our Believe Network Space Eco-System Which is running now like in the current project and Upcoming Projects:**

**1. Planet Upgrade system, 2. Universe Club Matrix System, 3. Royalty NFT, 4. BN Coin Mining, 5. Staking Program, 6. Global System 7. Gaming and Metaverse System.**

### **THEN YOU CAN SEE IN THE MARKET THERE WILL BE:**

Shopping carts (PayPal, Amazon, Flipkart, Alibaba.com, eBay, and all other Local Shopping portals), Pay buttons, Digital product and services downloads, Digital Marketing and Software sales, and Website membership subscriptions.

Anything Purchased through a website should be available to pay with cryptocurrency and BN COIN  could lead the way in making this possible and simple for webmasters. With webmasters on board, it will be easier to convince the mainstream audiences of the benefits of digital currency over traditional fiat currency. If a consumer can easily purchase and use a cryptocurrency then many will see the deflationary appeal as a big incentive over inflationary local currency.

BN COIN  will eventually comprise multiple products related to the financial field. We will explain briefly them hereunder. A white paper will be published to provide you with further information before the launch of each product.

## BN DEX SWAP:

We will Introduce Our Own BN DEX SWAP.

Decentralized exchanges are cryptocurrency platforms that enable peer-to-peer transactions directly from your digital wallet, eliminating the need for intermediaries.

**Dexes** like **Uniswap**, **PancakeSwap**, **dYdX**, and **Curve** facilitate secure and transparent trading, ensuring users maintain control of their funds.

---

## BN DEX WALLET:

A cryptocurrency wallet is a secure digital wallet used to store, send, and receive digital currency like BN COIN . In order to use any cryptocurrency, you will need to use a cryptocurrency wallet, herein we bring you one of the best cryptocurrency wallets – BN DEX Wallet.

BN DEX Wallet is a cloud-based wallet that offers end-to-end encryption of private data and is accessible from any computing device from any location worldwide. It runs on blockchain-based security which helps you backup your funds, and protect them from unauthorized access. The user interface is safe, simple, and fun. It is our endeavor that the BN DEX Wallet be accepted everywhere in the world, regardless of your country's currency. Your card will adapt to the geographical area in which you are located. You will be the only one to control your finances. We unceasingly repeat that no person or company will be able to consult your transactions. We will offer options that do not exist yet and provide enhanced security.

# **BELIEVE NETWORK SPACE ECO-SYSTEM COMMUNITY**

The use of digital currencies is continuing to grow around the world, whilst at the same time, new applications for the blockchain technology which underpins it are popping up constantly and at a very fast pace. This creates a huge of opportunities for entrepreneurs / consumers / other stakeholders to capitalize on. Establishing your business within a young and growing industry like this may be seen as risky by some, but it also offers the potential for phenomenal growth rates.

Believe Network Space Eco-System community is an excellent platform to raise funds for your upcoming venture or any idea that you have in mind. The community acts as a platform for like-minded entities to work together towards a better future for society as a whole and simultaneously provides an excellent opportunity to make some serious returns on their investment.

Going forward, we envisage that the Believe Network Space Eco-System community will be able to help take part in helping as well as conserving nature in any way possible. The public could donate some amount of BN COIN  or any other related currency for a cause that they find appealing to them which would then be used to fulfill that cause, providing top-of-the-class updates for the same.

---

# TARGET AUDIENCE

There is no better feeling than trading with cryptos and discussing this with like-minded people. As all of our BN COIN 🏠 team members are traders themselves (required), we know how a trader thinks and acts. We could categorize ourselves as a part of the target audience. Due to our collective effort and research, we came up with three main audiences for BN COIN 🏠 users. With the rise of awareness about the potential future of blockchain technology, the number of people who are interested in diversifying their portfolio with cryptocurrencies has expanded tremendously. According to an academic study, it is estimated that in 2023, there were over 420 million cryptocurrency users worldwide. This is an 8,000%+ growth rate from 2016 when there were only 5 million users.

The number of active users in cryptocurrency has increased by 39% from January 2022 to January 2023. The monthly average of daily active users (number of unique sender addresses) was 326.0K in January 2022 and 453.2K in January 2023.

The global cryptocurrency market cap is currently \$1.12 trillion. Crypto Potato predicts that by 2030, there will be one billion users. This number is still growing each year.

It is quite impressive already and it seems to be a lot, but we are convinced that this number is an underestimation to indicate how big the interest in cryptocurrencies is. The study is counting the active users and not the number of users who are interested but are not active yet. We believe this group of users is not active yet mainly because of two reasons.

1. The primary reason is that this group of users are beginners and they don't even know how to start investing in cryptocurrencies.

2. The secondary reason is that they might also be insecure in the fairly new cryptocurrency world, hence they haven't taken any action yet.

This group of people is also our main target and they form the core activity of the BN COIN 🏠 ecosystem.

# CONCLUSION

This whitepaper has been prepared to provide the most detailed information about BN COIN  concerning its key characteristics and features, the most important technologies used in its development, and the risks associated with it.

We have succeeded in finding out and establishing that the Pre-Mine consensus BN COIN  is based on fact to be more secure, just, and eco-friendly as well as less difficult to use.

BN COIN  is a new progressive cryptocurrency, which supports an unlimited number of transactions between different devices at high speed with its crypto mapping technology, which makes it a viable option for micropayments.

BN COIN  is going to sign contracts with some big players around the world, and we are ready to take the financial industry to the next level.

Traditional payment system requires efforts to manage and maintain the systems. In the case of BN COIN , less maintenance with nearly transaction fees puts up maximum benefits to the users of BN COIN .

BN COIN  offers not only a decentralized payment mechanism based on the blockchain but also a sustainable economy that produces, manages and securely sends/receives a large number of transactions each and every second. Last but not least, the BN COIN  is just going to be the first leading peer-to-peer cryptocurrency to manage high-value instant payments.

BN COIN  is more than just a coin. It's a technology poised to disrupt the entire payment industry covering peer-to-peer payments and mass payments. It is a revolution in the realm of peer-to-peer cryptocurrency payments.
